

System Logistics GmbH

A MEMBER OF THE KRONES GROUP

Perfectly organised flow of goods

Short distances to bridge, slim processes and flexible material flows which optimally adapt to suit production and shipping. Absolute efficiency is the first priority in material flow technology. To measure up to this objective, we leave nothing to chance when planning and realising your material flow project:

As a general contractor, System Logistics not only takes over customised intralogistics projects, but develops almost all system solutions including the software.

System Logistics GmbH at a glance

- Turnkey intralogistics solutions in the food and beverage industry
- Planning and design of fully automatic storage, customising and material flow systems
- High-speed feeders, conveyors and automated guided vehicle systems
- Long-term partnership aiming at an integrated delivery chain

At your service worldwide

At its two headquarters, one in Fiorano (System Logistics S.p.A.) in Northern Italy, and the other in the South German Wackersdorf (System Logistics GmbH), the company provides all the core functions, such as development, engineering, project management and service. System Logistics is also present worldwide, with its own locations and the network of the Krones Group in more than 156 countries.

Technology centres

- > **System Logistics S.p.A.:** Fiorano Modenese, Italy
- > **System Logistics GmbH:** Wackersdorf, Germany
- > **System Logistics Corporation:** Arden, USA (North Carolina)

Plants

- > **System Logistics S.p.A.:** Fiorano Modenese, Italy
- > **System Logistics Corporation:** Arden, USA (North Carolina)

Subsidiaries

- > **System Logistics Spain:** Spain and Portugal
- > **System Northern Europe:** Scandinavia
- > **System Ltd:** UK and Ireland
- > **System Logistics Corporation:** USA and Canada
- > **System Log de Mexico:** Latin America
- > **System Logistics Asia:** Asia Pacific and southwestern Asia

Our headquarters in Wackersdorf

We familiarise ourselves with your products and processes, investigate in existing material flows and systematically look for so far unused potential. We advise you on the selection of the technical equipment and supervise the complete construction process up to commissioning. At the end, we hand over a turnkey storage facility or distribution centre with processes, a technology and software which seamlessly fit into your production process.
